

# How to Checkout a Project?

## Step 1 – Create a New Project

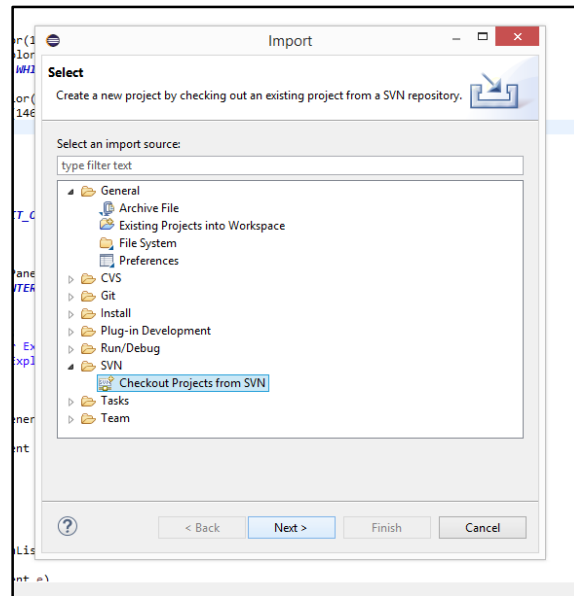

## Step 2 – Right Click the project you just created in the *Project Explorer*

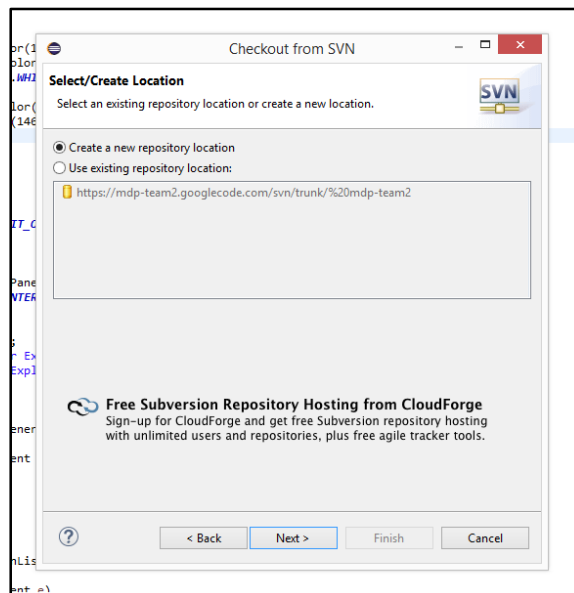

## Step 3 – Select *Import* and a window will pop up

## How to Checkout a Project?

Step 4 – Expand (if closed) **SVN** folder and select *Checkout Projects from SVN*

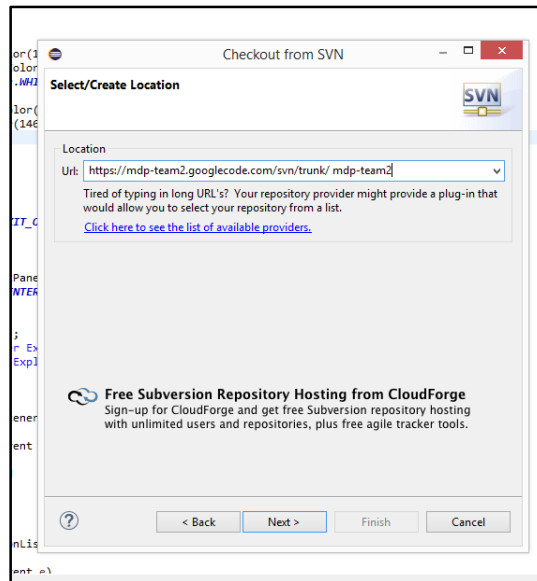

Step 5 – Unless you have already checked out the project from the server, and you know which server to check out from, select *Create a new repository location*.

At this point onwards, you may refer to this website very often to obtain your information.

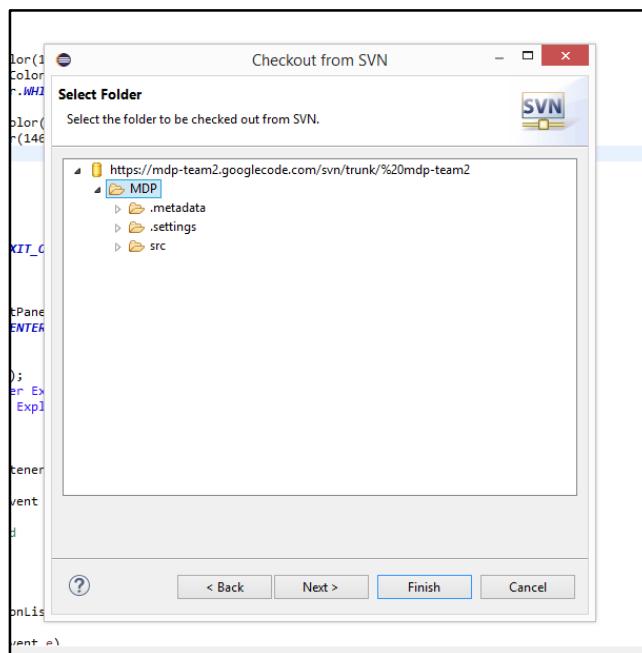

<https://code.google.com/p/mdp-team2/>

## How to Checkout a Project?

Step 6 – In the URL section, enter the following path

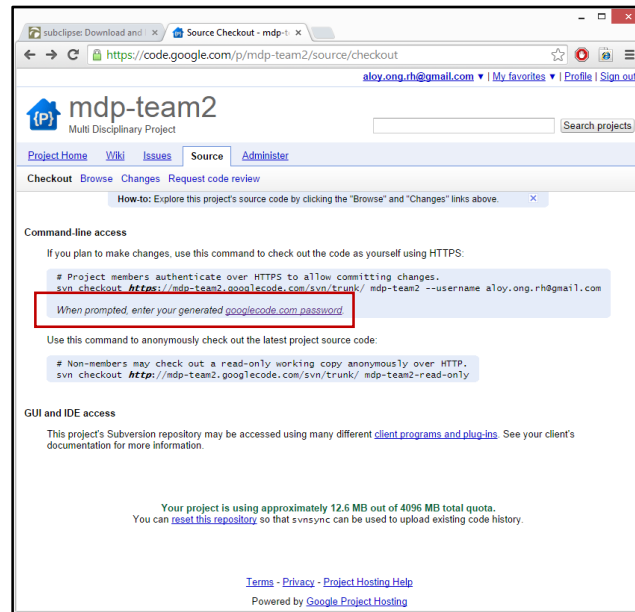

`https://mdp-team2.googlecode.com/svn/trunk/ mdp-team2`

Step 7 – Select *MDP* and click *Finish*

Step 8 – Go to <https://code.google.com/p/mdp-team2/> and select *Source*

## How to Checkout a Project?

Step 9 – Select *generate googlecode.com password*

Step 10 – When prompted to key in your credentials, use your google account for username and the generated password for password.
